

EV POWER DISTRIBUTION SOLUTIONS

We have been building compact, custom high-performance solutions for almost a decade, with hundreds of units in the field and hundreds more satisfied clients.

“Eversource has partnered with Merrimac to build custom electrical cabinets for its EV Charging Program since 2018. During that time, Merrimac has consistently delivered a high-quality product, with hundreds of units now in the field that are performing as promised...would highly recommend their services to others!”

- Steve Conte, EV Project Manager, EV Mobility

QUALITY IN, QUALITY OUT

- ✓ We use only the highest-quality components throughout from vendors like Siemens and ABB. Our products are hand-assembled by master wiremen.

CONNECT AND GO

- ✓ Bottom-entry connectors let you attach to the grid and power up fast. All units tested under load before they ship. Compact size.

WEATHER READY

- ✓ Slope-top NEMA 4 enclosure sheds snow. Durable gasketing for long term performance. Built-in heater ensures power is always ready!

EVERY DETAIL MATTERS

- ✓ Nylon roller locks means no rusted locks. Stainless steel hardware out-side won't corrode. We thought of everything so you don't have to!

Part Number	Load Center	Circuits	Size Enclosure
SKP5514	1PH/225A/208V	5-40A circuits 2-20A circuits	48"H x 36"W x 16"D on 12" foot kit
SKP5515	75kVA 3PH/125A 480V to 225A/208V	10-40A circuits 2-20A circuits	48"H x 36"W x 16"D on 12" foot kit
SKP5517	3PH/225A / 208V	10-40A circuits 2-20A circuits	48"H x 36"W x 16"D on 12" foot kit
SKP5599	1PH/208V/400A	10-40A circuits 2-20A circuits	48"H x 36"W x 16"D on 12" foot kit
SKP6398	150KVA XFMR 480VAC/3PH/225A to 208VAC/3PH/400A	20-40A circuits 2-20A circuits	72"H x 36"W x 20"D on 12" foot kit
SKP5568	400A/3PH/280V	4-100A 3 Phase circuits	48"H x 36"W x 16"D on 12" foot kit

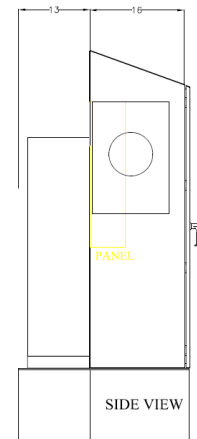

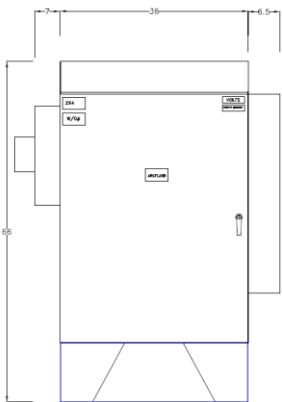

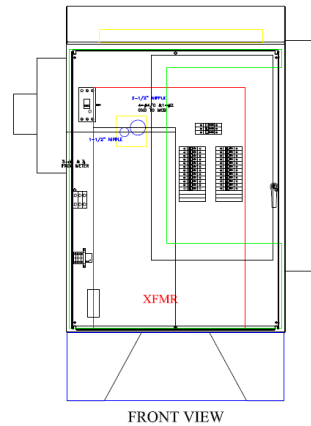

LEVEL 2 & LEVEL 3 OPTIONS

THINK BIGGER, DELIVER BIGGER

If you are looking for multiple units in a single all-in-one cabinet, we have already done it and will do it again.

Our key advantage outside of the design: flexibility and intelligence - with 8 engineers on staff, we can customize and pivot quickly. You will know your engineer by name, and we will ensure the end result is the perfect solution to your needs, no matter how big the project - even multiple cabinets as one block.

HANDMADE TO ORDER IN THE USA

Shorter lead times are just one benefit of our bespoke service. Our master craftsmen and women have decades of experience and take pride in every cabinet being done the right way. We support that guarantee by testing all functions before shipping out any unit, ensuring that your cabinet will truly be plug-and-play on the jobsite.

Merrimac Industrial Sales can adapt as needs change, as well as being able to scale production to meet your needs.
